

Rapid Application Migration (RAM)

Evaluate cloud readiness for one candidate application, build a Secured Landing Zone in Google Cloud, and move the application to the newly created Secured Landing Zone.

OVERVIEW

We understand how important it is to plan an optimized migration to Google Cloud to get the most value from your investment. The process starts with evaluation of where you are in the cloud adoption journey and identify a candidate application that can be migrated to cloud into production. The migration includes app discovery, creation of a secure landing zone including cloud foundation, and migration of an application. This offering can help companies build a comprehensive business case to move to the cloud.

OUR PROCESS

Discover

Identify the candidate MVP application to be moved to GCP.

Analyze

Evaluate the candidate application for cloud readiness.

Build

Create new Secured Landing Zone in Google Cloud.

Migrate

Validate the Secured Landing Zone and migrate the MVP candidate application.

KEY BENEFITS

Reduce Costs

Operational Efficiency

Improved Performance

Better Security & Reliability

ONIX DIFFERENTIATION

Onix is a trusted cloud consulting company and leading Google Cloud partner that helps companies get the most out of their technology with innovative, cloud-powered solutions and services. We are able to deliver exceptional results for our customers because of our 20+ year partnership with Google Cloud, our dedication to customer success, and depth of technology expertise.

- 20 Year Google Partner
- 12x Google Partner of the Year award winner
